Who We Are

engineers without borders ireland

Engineers Without Borders-Ireland (EWB-I) is a registered charity formed in 2010 to promote sustainable development through engineering.

EWB-I aims to

Harness the creativity and innovation of engineers to improve the resilience of disadvantaged communities, both in Ireland and overseas

Give engineers, scientists and other professionals the opportunity to contribute to sustainable development globall

Promote global awareness and an understanding of other cultures among engineers, engineering students and other disciplines

EWB-I works in partnership with industry, academia and non-governmental organisations (NGOs) to implement sustainable engineering projects and educational programmes around the world.

Our projects and programmes are funded by partners who share our goal of improving the living conditions and educational opportunities of vulnerable communities around the world.

We offer different levels of CSR partnership and benefits depending on the contribution made by companies.

100% of the support we receive goes directly to the implementation of our projects and programmes.

Why and How

Why should you partner with EWB-I?

This generation of engineers and scientists are faced with unprecedented technical, social and environmental challenges. By partnering with EWB-I, we can offer your staff the opportunity to add value to our global teams, often solving problems at the interface of traditional disciplines. By doing this, your organisation can help us to create a global impact.

How can you partner with EWB-I ?

There are a number of partnership and funding opportunities;

DONOR

As a donor you can contribute to our work by an annual or once off subscription. You will be invited to our events where you can learn from our work, contribute in discussions and support the wider EWB global community.

STRATEGIC PARTNER

EWB-I will work with your staff to jointly develop projects which contribute to your Corporate Social Responsibility. Partnerships normally range from two to three years and include a financial contribution.

INNOVATION PARTNER

Your support, either financial or technical, will enable the development of creative solutions in our Innovation Academy.

RESEARCH PARTNER

Research partnerships can range from partnering on major international funding proposals to providing technical/ financial support for educational activities in Ireland and overseas.

Overseas Development Projects

DONOR

Nepal – E-library

The overall objective was to create a comprehensive way of digitizing books, archives, and other digital documents to enhance an effective and quality education for 1200 students and the wider community.

Public Donations

INNOVATION PARTNER

Uganda – Water Monitoring

Using equipment kindly donated by the EPA and local authorities, we partnered with Malteser International to provide water monitoring in refugee camps in Arua district in Northern Uganda, which has seen an influx of refugees fleeing the civil war in South Sudan.

EPA - Innovation Partner

STRATEGIC PARTNER

The Philippines – Renewable Energy Feasibility Study

TEN Foundations support a community enterprise in the Philippines which produces school bags that are sold across three locations in Northern Ireland. The area they work in is extremely rural and as a result is often affected by power cuts causing loss of income. EWB-I, in partnership with ARUP, are investigating a renewable energy solution which will create energy security by use of PV, biomass and small-scale hydro.

ARUP - Strategic Partner

Uganda – Kisiizi Hospital Primary School

We provided technical advice to our partner UCDVO for the design and construction of a Special Needs Primary School and associated accommodation blocks on the grounds of Kisiizi Hospital in Uganda.

UCDVO - Research Partner

RESEARCH PARTNER

Innovative Design of Universal Crutch Kit

EWB-I has partnered with the National College of Art and Design (NCAD), together with Field Ready, to develop an innovative crutch design capable of being fabricated within low income countries using locally available materials. EWB-I are working with Fab Labs in Nepal and Bangladesh to bring this prototype to field testing stage.

NCAD & Field Ready - Research Partners
ARUP Trust - Strategic Partner

RESEARCH PARTNER

STRATEGIC PARTNER

Rapid Design Network

EWB Ireland are working with our International Partner, Field Ready, to coordinate a rapid design network to develop low cost solutions which can be manufactured locally to respond to the pandemic. Field Ready are an International NGO who work with local communities using 3D printed technology to manufacture supplies in the field so that people have what they need, where and when they need it.
